DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33, drawn to machine translation, classified in class 704, subclass 2.
 - II. Claims 34-65, drawn to dictionary building, classified in class 704, subclass 10.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention ^{II}~~II~~ has separate utility such as a dictionary used for retrieval of information. In claim 64, page 75, line 1, no patentable weight is given to the phrase "discourse-based machine translation" in the preamble due to lack of language translation step in body of claims. See MPEP § 806.05(d). JLS
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
